

Lesson 1: Introduction to the Spark Environment

1.4 Why Spark?

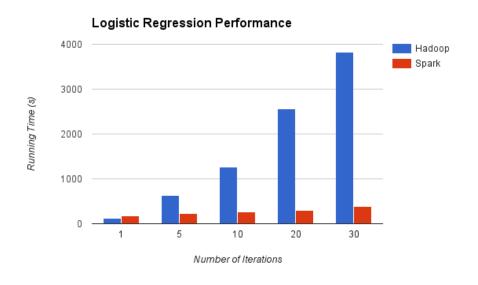

Why Spark?

- Handles petabytes of data (and more!)
- Significantly faster than Hadoop Map-Reduce (for most jobs)
- Simple and intuitive APIs
- General Framework
 - Runs Anywhere
 - Handles (most) any I/O
 - Interoperable libraries for specific use-cases

Performance

- Very fast at iterative algorithms
- DAG scheduler supports cyclic flows (and graph computation)
- Intermediate results kept in memory when possible
- Bring computation to the data (data locality)

Rich API

map() reduce()

filter() sortBy()

join() groupByKey()

first() count()

map()

reduce()

... and more ...

Rich API

package org.myorg;

```
text_file = spark.textFile("hdfs://...")

text_file.flatMap(lambda line: line.split())
    .map(lambda word: (word, 1))
    .reduceByKey(lambda a, b: a+b)
```

```
